Academic Projects

Loan Request Application (ServiceNow)

Feb 2025

- Built a custom loan request application using ServiceNow Studio, automating the loan request and approval workflow with Flow Designer.
- Configured role-based access control, notifications, and automated task assignments, ensuring seamless user and role management in line with CSA principles.
- Developed reports and dashboards for real-time loan tracking and approval metrics, leveraging custom application development skills from CAD.

PaddyInSync – Telangana Paddy Procurement Analysis

Aug 2024

- Developed an AgriTech solution leveraging MERN stack and Python clustering on satellite imagery to analyze paddy cultivation patterns across Telangana.
- Implemented a village-level database in MongoDB, integrating geolocation and crop insights for procurement analysis.
- Achieved 4th place at Megathon hackathon, with impact focused on empowering farmers, digitizing agriculture, and ensuring fair distribution.

Achievements

- Achieved Global certification on ServiceNow CSA & CAD
- Achieved Global certification on AWS Certified Cloud Practitioner on Mar 26, 2024
- Participated in IIIT Hackathon and secured 4th Position – Oct 2024, Obtained 1st Position in a Webathon held at KLH University - Jan 2023, Achieved 1st Position in paper presentation held on 1st Oct' 22 at KLH University.
- Designed **GradIntern platform**, enhancing accessibility for students seeking internships.
